

Welcome Four Year PhD Programme in Integrative Cell Mechanisms

University of Edinburgh

www.wcb.ed.ac.uk/iCMPPhD

Application deadline: Wednesday 11 December 2019

The Wellcome Four Year PhD Programme in Integrative Cell Mechanisms (iCM) is closely associated with the Wellcome Centre for Cell Biology (www.wcb.ed.ac.uk) and trains the next generation of scientists in the application of quantitative methods to determine cellular mechanisms.

Projects are cross-disciplinary with two primary supervisors having complementary expertise.

Applications are encouraged from students with a variety of backgrounds including Biomedical Science, Biophysics, Cell Biology, Chemistry, Computational Data Sciences, Mathematics, Physics. Students will be trained to adapt, broaden and apply their skill set to the understanding of cellular mechanisms of biomedical importance.
